What is this product?

Type

The product is a UCITS - Part 1 sub-fund of a SICAV under Luxembourg law. The fund is a UCITS ETF.

Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The 1C share class of Xtrackers LevDAX Daily Swap UCITS ETF was launched in 2010.

Objectives

The fund is passively managed. The aim is for your investment to reflect the performance of the LevDAX® Index (index) which provides two times the performance of the DAX® Index (Underlying Index) on a daily basis less a rate of interest. This means that the level of the index should rise and fall at double the rate of the Underlying Index. The interest rate deducted from the index level is based on the rate at which banks in the Eurozone lend to each other overnight (as calculated by the European Central Bank). The Underlying Index reflects the performance of the shares of 40 of the largest German companies (from any business sector) on the Frankfurt Stock Exchange which meet the applicable eligibility criteria. To be included on the Underlying Index, a company's readily available shares must be listed and continuously traded on the Frankfurt Stock Exchange, and show a free float portion of at least 10% and meet order book turnover requirements on the Frankfurt Stock Exchange within the preceding 12 months. The Underlying Index is weighted in favour of larger companies and is reviewed and rebalanced at least quarterly. At each review, the combined value of a company's readily available shares cannot exceed 10% of the combined value of the shares comprising the Underlying Index. The index is calculated on a gross total return basis which means that all dividends and distributions are reinvested in the shares on a gross basis. To achieve the aim, the fund will enter into financial contracts (derivatives) with one or more swap counterparties to swap most subscription proceeds for the return on the index. Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. This fund is a sub-fund of Xtrackers for which the sales prospectus and the periodic reports are prepared as a whole. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. More share classes may be available for this fund - please refer to the relevant section of the sales prospectus for further details. You are not permitted to exchange your shares in this fund for other funds of Xtrackers. The depositary is State Street Bank International GmbH, Luxembourg Branch. More detailed information of this fund, such as the sales prospectus as well as the latest annual and semi-annual report, can be obtained free of charge online at www.etf.dws.com. These documents are available in English or German. The documents as well as other information (including the latest share prices) are available free of charge.

Intended retail investor

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity to pay you.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The following risks could be of particular significance for the fund: Derivatives risk, Conflicts of interest risk, Counterparty risk, Shares risk, Rules based index risk, Leveraged Index risk. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus. You may lose some or all of your investment. Your risk is limited to the amount invested. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example Investment:	1 day 10.000 EUR	
	If you exit after 1 day	
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after costs Average return each year	0 EUR -100.0 %
Unfavourable	What you might get back after costs Average return each year	9,230 EUR -7.7 %
Moderate	What you might get back after costs Average return each year	9,990 EUR -0.1 %
Favourable	What you might get back after costs Average return each year	10,470 EUR 4.7 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. For the recommended holding period the following applies: This type of scenario (Favourable, Moderate, Unfavourable) occurred for an investment between (Favourable: 30.10.2014-31.10.2014, Moderate: 28.11.2019-29.11.2019, Unfavourable: 27.02.2020-28.02.2020).

What happens if DWS Investment S.A. is unable to pay out?

The assets of the fund are kept separately from those of the management company, DWS Investment S.A.. An insolvency or default of the management company should not result in the fund suffering any financial loss in relation to its assets. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected. Cash deposits of the fund deposited with other credit institutions may cause investors to suffer a financial loss if such deposits are not covered by any existing deposit guarantee schemes. Investment in the fund is not covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

	If you exit after 1 day
Total costs	0 EUR
Cost impact (*)	0.0 %

*This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

How long should I hold it and can I take money out early?

Recommended holding period: 1 day. The product has no minimum holding period.

This product has no required minimum holding period. The recommended holding period has been selected due to its investment strategy and because it is designed for a short term investment horizon. It is expected that it will be possible to achieve the investment objective of the fund within this time frame. You may request the redemption of shares generally on each valuation date. No fees or penalties will be charged by the company for any such transaction.

There is no change on the risk return profile when you redeem your shares early.

How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following address:

Postal Address: DWS Investment S.A., B.P. 766, L-2017 Luxembourg; Email: dws.lu@db.com; www.dws.lu
